

Amendments to the Specification:

Please replace the paragraph beginning at page 2, line 20, with the following amended paragraph:

It is an object of the present invention to provide a method and apparatus that enables the problem of the temporary archiving of a message to be solved. The invention method enables the synchronization, without risk of data loss, of the communication of multimedia messages between two servers. These multimedia messages are exchanged between terminals that communicate, in a digital network, with the two servers. These multimedia messages comprise one or more images, text messages, or even voice or audio messages.
